ABOUT NURSING RESEARCH DAY

DESCRIPTION AND PURPOSE
University of Minnesota School of Nursing faculty and students, with engaged community partners, will showcase research studies and evidence-based clinical innovations discussing implications for practice, policy and enduring research. The purpose of University of Minnesota School of Nursing Research Day is to advance nursing science and scholarship as the foundation for practice.

PROGRAM OBJECTIVES
After attending, participants will be able to:
• Describe nursing and interdisciplinary research and evidence-linked initiatives in the School of Nursing and the health care community.
• Investigate ways these innovations can be used to optimize health outcomes in clinical practice, health policy and research.

ACCREDITATION
The University of Minnesota School of Nursing, Office of Practice, Partnerships, and Professional Development is accredited as a provider of continuing nursing education by the American Nurses Credentialing Center’s Commission on Accreditation. This activity is awarded up to 4.5 contact hours.

Note: ANCC accredited contact hours are accepted by all State Boards of Nursing.
Other Health Professionals: It is the responsibility of each participant to determine if the program meets the criteria for re-licensure or re-certification for their discipline. Each participant will receive an Evidence of Participation document. Please check with your accrediting organization for complete requirements.
Robin Newhouse, PhD, RN, NEA-BC, FAAN
Professor and Chair of Organizational Systems and Adult Health, University of Maryland, School of Nursing
Vice-Chair of the Methodology Committee of the Patient-Centered Outcomes Research Institute

Dr. Newhouse received her PhD, MS and BS degrees in nursing from the University of Maryland School of Nursing and her MGA in health care administration from University of Maryland University College. Her research has focused on improving quality of care and implementing evidence-based processes in practice settings and conducting outcomes research in health care delivery settings, including rural hospitals. Clinical research topics have included improving heart failure outcomes and nurse-led interventions to improve screening and treatment for substance use.

KEYNOTE PRESENTATION
The keynote is supported by funds in honor of Barbara O’Grady, an influential public health leader and supporter of the University of Minnesota School of Nursing, and the Katharine J. Densford International Center for Nursing Leadership.
