Few professions offer the flexibility, satisfaction and respect that a career in nursing provides.

The Master of Nursing program is a full-time, graduate-level program for students with a baccalaureate degree in another field.

Graduates are well-prepared to enter the nursing field and pursue further education leading to careers in teaching, research or advanced practice nursing.

This intensive 16-month program includes the elements of a Bachelor of Science in Nursing program, plus additional graduate courses.

Students in the Master of Nursing program at the University of Minnesota represent a rich diversity of educational and professional backgrounds. They bring prior experience as teachers, artists, attorneys, business people, technicians and more. This brings great energy, openness and collaboration to the program.

WHY THE SCHOOL OF NURSING?

The school partners with more than 250 health and community organizations to provide students with exceptional supervised clinical experiences. As a student, you will have a range of learning experiences to further develop your skills, perspectives and understanding of the continuum of care provided by nurses.

The School of Nursing’s new Bentson Healthy Communities Innovation Center, a state-of-the-art simulation learning resource, provides students with the opportunity to practice using the latest technology. As a nursing student, you will have the opportunity to participate in classes and activities that teach you how to work effectively with other members of the health care team.

As a graduate of this program, you will be prepared to take the national licensure exam to become a registered nurse. You will also have up to 18 credits to apply toward a Doctor of Nursing Practice degree. Graduates are eligible for certification in public health nursing in Minnesota. The Master of Nursing program at the University of Minnesota is accredited by the Commission on Collegiate Nursing Education.

WHY THE UNIVERSITY OF MINNESOTA?

With a rich and collaborative environment for discovery, the University of Minnesota health sciences combine to form one of the largest, most comprehensive academic health centers in the nation. Our colleges, schools, centers and programs focus on educating the next generation of health professionals, conducting groundbreaking research and working together to improve health.

Your educational experience will be enhanced by award-winning faculty, state-of-the-art learning facilities and the extraordinary recreation and cultural offerings of a city that is consistently ranked among the most healthy and livable in the country.

The School of Nursing, founded in 1909, is the oldest continuously operated school of nursing based in a university in the country. The school’s dynamic past informs its bright future.
